2019 Beginning Cash Balance

The difference between the 2018 beginning cash balance and the 2019 beginning cash balance is \$11,195.52.

The last three years are the largest cash beginning balances since 2000.

What other factors affected the 2019 beginning balance? [Unanticipated Expenses](#)

1. The replacement of the **pedestrian bridge** on Arlington Road (\$39,000)
2. Major exterior repairs to the **Community Theatre** (\$37,000)
3. Increase in **dispatch fees** (\$48,000)
4. Unexpected **salt price increase** (\$32,000)
5. Decline in **EMS revenues** (\$89,000)

TOTAL CASH SWING (\$245,000)

The 2018 Unanticipated Expenses were all justified expenditures, but could not have been predicted ahead of time. As a result of these expenditures, there was a slight decline (less than \$12,000) in the General Fund beginning cash balance for 2019.

There will always be unexpected expenditures which is why it is important to always add to the cash carryover balance.
